

## Deliver a modern learning solution to keep your workforce ready for what's next.

### Critical Learning Channels. Expert Content. Personalized Experience.

Introducing **Business Essentials**, a collection built to support the workforce with critical topics they need to perform and succeed in today's digital economy.

We believe in helping people reach their highest potential through engaging and relevant learning content delivered in a platform that is easy and delightful to use. As the leading provider of corporate learning, we know that choice, flexibility and budget are key levers in determining the solution that fits organizational goals, and learners' needs.

Designed to deliver courses on core topics that are relevant to today's digitally driven marketplace, Business Essentials offers thousands of high-quality video courses that learners can easily find, track and play. Micro-learning video content allows busy employees to consume lessons quickly and conveniently, from their desk or anywhere they choose using the Percipio Mobile Learning App.

Carefully curated by experts, Business Essentials focuses on three key areas critical to organizational success and individual performance: Business Skills, Productivity and Collaboration Tools, and essential Technology and Developer training.

### Modern Learning Experience

Consumer-driven design enables an engaging user experience making it easy and fun to access learning tools.

Deliver learning in the flow of work: Enable ease of informal learning through discovery, social recommendations, and Percipio ELSA browser plugin

Track and measure progress and success with journey maps, reporting and analytics

Add multi-modal books/audiobooks and book summary collections to offer options for deeper study

Core Business and Management courses help employees build and improve their soft skills like communication, conflict resolution, managing teams and business writing.

All these collections are delivered on a state-of-the-art learning experience platform (Percipio) that leverages the latest tech tools like voice commands, social chat, personalization, playlists and a mobile learning experience that keeps learners engaged and coming back for more.
